Echos

colour communication

Characterised by state-of-the-art design, ECHOS is the most innovative ACI FARFISA videointercom line. The aesthetically pleasant structure, perfectly harmonised with new trends of interior architecture, delivers the most sought-after operational features. Echos has been developed in colour version, with 3.5" LCD that can be adjusted on the horizontal axis to compensate for reflections and ensure correct vision for the user. Moreover, it has been conceived in hands-free mode: once you have made the connection by simply pressing the activation button, your hands will be free with no traditional handset. It's provided with intuitive function-buttons for door lock release,

self-switch on of display, ring tone deactivation (with LED for status indication), audio volume and picture brightness adjustment, intercommunication, if available, and some additional features. The system takes advantage of the electronic call note to ensure the best sound quality. Echos has been designed for the most demanded technologies, starting from the digital system Duo System or FN4000, including reduced or conventional wiring installations.

DUO SYSTEM

EH9262CW

Dim: mm 208x103x26
Colour: white and grey

Colour hands-free monitor for Duo System Color. LCD 3.5" screen, adjustable on horizontal axis. Function buttons for door-opening, auto switch-on, bell exclusion (with LED indicating the setting), volume and brightness adjustment and 6 further buttons for intercommunicating and additional functions.

EH9262CT

Dim: mm 208x103x26
Colour: metal grey colour

Colour hand-free monitor for Duo System Color. LCD 3.5" screen, adjustable on horizontal axis. Function buttons for door-opening, auto switch-on, bell exclusion (with LED indicating the setting), volume and brightness adjustment and 6 further buttons for intercommunicating and additional functions.

REDUCED WIRING

EH9161CW

Dim: mm 208x103x26
Colour: white and grey

Colour hands-free monitor for 4+1 reduced wiring. LCD 3.5" screen adjustable on horizontal axis. Function buttons for door opening, auto switch-on, bell exclusion (with LED indicating the setting), volume and brightness adjustment and 6 further buttons for intercommunicating and additional functions.

EH9161CT

Dim: mm 208x103x26
Colour: metal grey colour

Colour hands-free monitor for 4+1 reduced wiring. LCD 3.5" screen adjustable on horizontal axis. Function buttons for door opening, auto switch-on, bell exclusion (with LED indicating the setting), volume and brightness adjustment and 6 further buttons for intercommunicating and additional functions.

FN4000

EH9160CWDG

Dim: mm 208x103x26
Colour: white and grey

Colour hands-free monitor for FN4000 digital system. LCD 3.5" screen, adjustable on horizontal axis. Function buttons for door-opening, auto-switch-on, bell exclusion (with LED indicating the setting), volume and brightness adjustment and further 6 buttons for intercommunicating and additional functions.

CONVENTIONAL WIRING, ELECTRONIC CALL

EH9160CW

Dim: mm 208x103x26
Colour: white and grey

Colour hands-free monitor for conventional wiring. LCD 3.5" screen adjustable on horizontal axis. Function buttons for door opening, auto switch-on, bell exclusion (with LED indicating the setting), volume and brightness adjustment and 6 further buttons for intercommunicating and additional functions.

EH9160CT

Dim: mm 208x103x26
Colour: metal grey colour

Colour hands-free monitor for conventional wiring. LCD 3.5" screen adjustable on horizontal axis. Function buttons for door opening, auto switch-on, bell exclusion (with LED indicating the setting), volume and brightness adjustment and 6 further buttons for intercommunicating and additional functions.

EH9100CW

Dim: mm 103x209x26
Colour: white and grey

Colour hand-free monitor for conventional wiring. LCD 3.5" screen adjustable on horizontal axis. Function buttons for door opening, auto switch-on, bell exclusion (with LED indicating the setting), volume and brightness adjustment.

ACCESSORIES

9083

Built-in back box for monitor.

WA9100W

Dim: mm 86x192x26
Colour: white

Wall adaptor for surface mounting of white monitors.

WA9100T

Dim: mm 86x192x26
Colour: metal grey colour

Wall adaptor for surface mounting of metal grey colour monitors.

TA9160

Dim: mm 135x240x75

Table adaptor for Echos monitors.

VIDEOKITS

Duo System technology

EH9262PLCW

One-way colour video kit with white Echos monitor and Profilo door station.

EH9262PLCW/2

Two-way colour video kit with white Echos monitors and Profilo door station.

EH9262PLCT

One-way colour video kit with metal grey colour Echos monitor and Profilo door station.

EH9262PLCT/2

Two-way colour video kit with metal grey colour Echos monitors and Profilo door station.

Reduced Wiring technology

EH9161PLCW

Colour one-way video kit with white Echos monitor and Profilo door station.

EH9161PLCW/2

Colour two way video kit with white monitor and Profilo door station.

EH9161PLCT

Colour one-way video kit with metal grey colour Echos monitor and Profilo door station.

Conventional wiring, Electronic call technology

EH9160PLCW

Colour one-way video kit with white Echos monitor and Profilo door station.

EH9160PLCW/2

Colour two-way video kit with white Echos monitor and Profilo door station.

EH9160PLCT

Colour one-way video kit with metal grey colour Echos monitor and Profilo door station.

EH9160PLCT/2

Colour two-way video kit with metal grey colour Echos monitor and Profilo door station.
